Inventory Clean-Start Checklist

Elite Academy — Mindbody Inventory Procedure Rollout

#	Step	What to do
1	**Confirm Owner access**	Find the true Owner/Admin Mindbody login. Confirm it can reach Settings > Staff > Staff Permissions.
2	**Pull fresh reports**	Run Inventory on Hand for Bedaya and Promenade (Include Oversold + Only In Stock/Oversold checked).
3	**Physically count**	Count every SKU showing negative or low stock at both branches by hand.
4	**Correct Mindbody**	Enter the true physical counts so on-hand numbers match reality. This is the clean baseline.
5	**Clean up test items**	Delete or archive placeholder products (e.g. “Kyokushin Test”, “Taekwondo Test”).
6	**Create branch accounts**	Owner creates “Branch Receiver – Bedaya” and “– Promenade” logins, each restricted to one location. Test the lock works.
7	**Set Coordinator access**	Decide: view-only login, or paper-only with no Mindbody account (per the procedure, they don't enter data).
8	**Brief team & go live**	Branch Receivers enter quantities the moment they sign a Breakdown or Transfer form. Reconcile weekly against the Inventory Change Log.

Steps 1–5 can start immediately. Steps 6–8 require Owner-level Mindbody access.
