Air Rate Comparison & Margin Analysis

Dhalay International — Original Invoice (DDP, Air) vs. New Air Rate Quote | Customs/Clearance factored at 20% on both

Item	Sell Price (KWD)	Original Invoice (Air, $)	Margin (Original)	New Air Rate ($)	Margin (New)	Margin Improvement
Karate Suit (Uniform)	25	$22.00	67.4%	$20.00	70.3%	+2.9 pts
Boxing Gloves	10	$18.00	33.3%	$14.00	48.1%	+14.8 pts
MMA Gloves	10	$20.00	25.8%	$15.00	44.4%	+18.6 pts
Shin Guards	10	$10.00	62.9%	$8.50	68.5%	+5.6 pts
Head Guards	10	$24.00	11.0%	$21.00	22.1%	+11.1 pts
Overall (weighted)	**-**	**-**	**36.5%**	**-**	**56.1%**	**+19.6 pts**

Basis of calculation:
Sell prices used: Karate Suit (Uniform) — 25 KWD; all other items — 10 KWD. Exchange rate: 1 USD ≈ 0.309 KWD.
Margin = (Sell Price in KWD – [Vendor Price in USD × 0.309 × 1.20 customs/clearance]) ÷ Sell Price in KWD.
Both the Original Invoice and New Air Rate figures have the same 20% customs/clearance assumption applied for a fair comparison, since DDP status on the new quote is not yet confirmed with the vendor.

Key takeaway: Overall margin improves from 36.5% to 56.1% (+19.6 points) with the new Air Rate quote — a genuine improvement, led by MMA Gloves (+18.6 pts) and Boxing Gloves (+14.8 pts). Head Guards remains the weakest item at just 22.1% margin even after improvement, and should be the focus of further negotiation. DDP inclusion on the new quote should be confirmed with the vendor, as margins shown assume customs/clearance is not yet included.
