Vendor Counter-Price Analysis

Dhalay International — Elite Academy Order | Target Margin: 75% | Customs/Clearance factored at 20%

Item	Target Sell (KWD)	Vendor Original Price (USD)	Counter Price to Vendor (USD)	Margin at Counter Price	Margin if Vendor Price Accepted
Karate Suit (Uniform)	25	$22.00	$16.85	75.0%	68.1%
Boxing Gloves	10	$18.00	$6.74	75.0%	44.3%
MMA Gloves	10	$20.00	$6.74	75.0%	38.1%
Shin Guards	10	$10.00	$6.74	75.0%	69.1%
Head Guards	10	$24.00	$6.74	75.0%	25.7%

Basis of calculation:
Exchange rate used: 1 USD ≈ 0.309 KWD.
Counter Price to Vendor (USD) = [Target Sell Price (KWD) × 0.25] ÷ 1.20 (customs/clearance) ÷ 0.309 (USD conversion).
"Margin if Vendor Price Accepted" reflects the resulting margin if the vendor's original quoted price is paid as-is, after adding 20% for customs and clearance costs on landing.

Key takeaway: Head Guards and MMA Gloves show the largest margin erosion if the vendor's original pricing is accepted (25.7% and 38.1% respectively, well below the 75% target), making them the highest-priority items to negotiate. Shin Guards and the Karate Suit hold up comparatively well even without full concessions from the vendor.
